FULL STACK DEVELOPER

I am a Full-Stack Developer with strong skills in the MERN stack (MongoDB, Express.js, React, Node.js), and my main focus is on backend development. I enjoy building server-side logic and creating RESTful APIs.
I have worked on several real-world projects like:
- A URL Shortener with features like analytics, QR code generation, and redirection tracking
- A complete E-commerce backend with product management, authentication, and payment support
- A Google Drive Clone with file upload, download, and sharing features
- A custom VS Code Theme Extension

While I can work on both frontend and backend, I feel more confident working on backend systems. I always try to write clean and scalable code and I'm eager to learn new things and contribute to exciting projects.

KEY SKILLS

JAVASCRIPT   REACT   GIT & GITHUB   NODE JS   EXPRESS   MONGODB   RDBMS

SQL   COMMAND LINE INTERFACE   System Design (LLD)   DATA-STRUCTURE & ALGORITHM

INTERNSHIP

EDUREKA   **AUG 2022 - DEC-2022**
FULL STACK DEVELOPER (MERN)
I completed an Edureka internship where I built a Zomato clone using the MERN stack and integrated Razorpay for payments. The project included user authentication, restaurant listings, search, and food ordering. This project enhanced my skills in full-stack development and payment gateway integration.

PROJECTS

Google drive clone
I made a Google Drive clone where users can upload, view, and search their files. It has login with Google, GitHub, and email OTP. I also added fuzzy search to find files easily. For security, I used CSP to protect from attacks like XSS. It's simple and easy to use.

Ecommerce-backend
This e-commerce backend is built with Node.js, Express.js, and MongoDB. It provides an API to manage users, products, orders, and payments. Features include login and user roles (customers and admins), order tracking, cart management. It uses caching and optimizations for better performance.

URL shortner
Created ShortenX, a simple URL shortener with features like custom links and tracking. Built using React and Node.js, with MongoDB for storing data. It allows users to easily generate and manage short URLs.

VSCODE THEME
I created a custom VS Code theme with my favorite colors. It gives a clean and simple look, and makes coding more comfortable and fun for me.   Link: **open**

CERTIFICATION & ACHIEVEMENTS

REACT (UDEMY)   **POSTGRESQL(COURSERA - UNIVERSITY OF MICHIGAN)**

3rd Rank in GenAI Hackathon
Top 10 Finalist – LLD Hackathon by Coder Army

EDUCATION

Bachelor of Computer Science   BITS PILANI   2023-2026

Diploma in Computer science & Engg.   Govt. Polytechnic Saharsa 2019-2022
